Customizable Systems

system supporting continuous zoom, auto-focus, and advanced image processing in a compact package.

A 15 μm pitch InSp FPA 640x512 image with 30x22 continuous zoom optics provides, superior image quality and FOV ranging from 18° to 0.8°

Key features

- capable of offering human detection up to 18km
- Horizontal field of view: 18.3° (W) to 0.83° (T)
- and vehicle detection up to 38km.
- 22x motorised optical zoom, F4.0.
- Pixel size: 15μm
- Resolution: 640 x 512

Applications

- Seaport and airport monitoring
- Military base security monitoring
- Oilfield and oil depot security
- Urban security and anti-UAV applications
- Fire source prevention and monitoring
- Border and coastal defence
- Highways and railways monitoring.

The user interface and command control are integrated with (DIS-10.1), a wide-view angle TFT LCD display, with a pixel resolution of 1280x800. It can be used as a simple monitor or intelligent panel PC, depending on the used control PCB.
